

## Project 1: Running Tests

1. Go to <https://github.com/USF-CS545-Spring18/project1> (if you are cs545 student) or <https://github.com/USF-CS245-02-Spring18/project1> (if you are cs245 student)
2. Copy **lib** folder with jar files and **test** folder with test files to your project directory (Note: not inside **src**, one level above)
3. Right click on the **test** folder, and select Mark Directory As -> Test sources root
4. Right click on the project, select Open Module Settings. Select Libraries tab, click on + and add two jar files from the lib folder to the project.
5. To run the tests, right click on Project1Test and click run. Note: Project1Test will run MovingRatingsListTest, UsersListTest and MovieRecommenderTest. You can also run these separately.
